Subject: microsoft settlement

states suing microsoft as well as aol using netscape to get money from microsoft thru the courts
is wrong. microsoft is being bullied by the goverment and stockholders have lost money because
of this court action. it also does not let microsoft give all the attention it needs to fight the hackers
and make the internet safe for all users including aol.

The reason we are so interested in Microsoft Programs is that children all over the world are benefiting
by Microsoft products,games and all sorts of programs as an educational tool. I'm so pleased when I see my
4year old granddaughter open the computer and do what she wants to do. She spends hours doing games
and playing her videos, instead of watching T.V all the time.
We have eight babies we encourage to learn all they can by buying programs for them at Birthdays and just
for fun.

We the elderly have fun also and we invest money into the future of Microsoft and other companies for the
future.
